Analysis Certificate

Animal data

Name: WOLFSIRIUS
Date of birth: 18.09.2015
Sexe: Female
Chip number: 968000010304665
Breed: Saarloos Wolfhond

Sample data

VHP_ID: H453629
Test ID-nr: 1000003899 1
Material: Swab

H673 - DM (partner lab) - Date of test: 16.10.2015
Testresult: NORMAL

W.A. van Haeringen, PhD
Executive Director

H673 - DM (partner lab)

Explanation about the result:

NORMAL: The animal is free and has two healthy alleles. When used in breeding, this animal will not become ill due to the disease. It cannot spread the disease in the population.

CARRIER: The animal is carrier and has one healthy and one mutant (disease) allele. When used in breeding, 50 percent of the offspring will receive the disease allele. Carriers will not become ill.

AFFECTED: The animal is affected and has two mutant (disease) alleles. When used in breeding, all offspring will receive the mutant allele from this animal. Affected animals will become ill.

VHP exercises the utmost care in performing each of its engagements. No party other than the principal may derive any rights from the results of these engagements, and the principal expressly indemnifies VHP in respect of any third-party claims. VHP policy provides that any complaints must be received within eight days of the completion of an engagement and imposes restrictions on liability. In that respect, VHP refers to its General Conditions, which are applicable to all engagements VHP performs and which were enclosed with the submission form. These General Conditions can also be reviewed at www.vhpgenetics.com. The work VHP performs is based on the material and/or data it receives from its principal. This report may only be copied in its entirety. The organization is ISO:9001 certified for all her work. A few tests are performed under accreditation. For a complete overview of accredited tests, please visit www.vhpgenetics.com. This test is based on PCR technology.
